Steady

LAST UPDATED: NOVEMBER 2026

# Offline Privacy & General Privacy Policy

Steady is built privacy-first. This policy explains, in plain language, how the Steady desktop application handles your activity and preferences, and what information the **get-steady.com** website collects.

## 1. Offline App Privacy (The Steady Desktop Application)

### 100% Local Signal Processing

Steady monitors activity signals (keyboard/mouse activity state and system media playback) strictly in local memory to determine when you are actively studying or idle. It never records keystrokes, screen contents, active window titles, URLs, or personal files.

### Local-Only JSON Storage

Your preferences and break timer states are saved in a local JSON file directly on your computer. There are no user accounts, no cloud syncing, and no external servers receiving your usage data.

### Zero Telemetry & Full Offline Operation

Steady contains no third-party analytics, crash-reporting trackers, or background network calls, and runs completely offline.

## 2. General Website Privacy Policy (get-steady.com)

### Waitlist & Contact Submissions

When you submit your email address or message through our waitlist or contact forms (processed via Netlify Forms), we collect only the information you voluntarily provide.

### How We Use It

Your email is used exclusively to send Steady beta updates, release announcements, or direct replies to your inquiries. We never sell, rent, or trade your data to third parties.

### No Ad Trackers & Data Deletion

**get-steady.com** uses no advertising pixels or cross-site tracking cookies. You may request access to or deletion of your submitted contact/waitlist information at any time by emailing get-steady@outlook.com.

## 3. Website Hosting & Netlify

### Who Hosts the Website

**get-steady.com** is hosted by Netlify, Inc., which also processes our waitlist and contact form submissions on our behalf. Netlify is based in the United States, so information you send through the website may be processed and stored there.

### Technical Information Netlify May Process

Like most web hosts, Netlify may automatically process standard technical information when you visit the site or submit a form, such as your IP address, browser type, and the date and time of your request. Netlify uses this information to deliver the website, keep it secure, and filter out spam submissions. We do not use it to track or profile you.

### How Long Submissions Are Kept

Waitlist and contact submissions are stored in our Netlify account until we delete them. When you ask us to delete your information, we remove your submissions from Netlify.

### Netlify's Privacy Policy

For details on how Netlify handles data, see Netlify's own privacy policy at **netlify.com/privacy**.
